Software Developer

408.843.7027 one.rivas@gmail.com onerivas.com [GitHub](#) [LinkedIn](#)

I am a curious thinker who is excited to continue to learn new technologies and further grow as a human-centric software developer in the rapidly evolving industry of software development. I leverage my technical knowledge of various front-end and back-end development technologies and my analytical troubleshooting skills to deliver thoughtful solutions to today's problem. I enjoy bringing compassion, patience, and emotional intelligence to a team and helping colleagues stay motivated and feel valued.

Skills

JavaScript
Node.js
React
jQuery
AJAX
Axios
HTML 5/CSS 3
Express
MongoDB
Mongoose
PHP
PostgreSQL
Heroku
GitHub
Git
Web Development

Adobe XD
Adobe Creative Suite

Education

General Assembly Software Engineer Immersive

Certificate of Completion

The Art Institute of California - Sunnyvale

Bachelor's Degree - Media Art
and Animation.

West Valley College

Communication Studies
Certificate

Projects

NASA Photography

- <https://onerivas.github.io/NASA-app/>
- Created app from concept to final design using **jQuery, AJAX, HTML, CSS, JavaScript**, and the NASA APoD API
- NASA Photogrpahy is a photo gallery collecting the daily NASA APoD into monthly collections.

DoggieToDooDoo

- <https://doggie-to-doodoo.herokuapp.com/>
- Created the front-end app from concept to final design using **React, React-Router, Axios, Bootstrap, JavaScript, and Heroku**. A separate back-end server was created using **Express, MongoDB, Mongoose, Passport, BCrypt, and Heroku**.
- DoggieToDooDoo is a app that helps owners keep track of their pets day.

My Movie Collection

- <https://safe-castle-33189.herokuapp.com/home>
- Created using **EJS, HTML/CSS, Express, Express-Sessions, MongoDB, Mongoose, Method-Override, BCrypt, Bootstrap, and Heroku**.
- My Movie Collection is a app to help users manage their movie collection and track who movies are lent out to.

mossJobs

- <https://limitless-oasis-80314.herokuapp.com/>
- mossJobs was created with a partner. My main role was creating the back-end. I set up **MongoDB and used Express and Mongoose** to connect the front-end. Also contributed to design and implementation of CSS styling. mossJobs is a app to post job opportunites and share with our fellows in our cohort.
- mossJobs is a app to post job opportunites and share with our fellows in our cohort.

Experience

General Assembly , Remote — Software Engineer Immersive. Aug., 2020 - Nov. 2020

- Learned various Front-end and Back-end development technologies in an immersive 40+ hour a week 3-month program..
- Quickly developed strong technical and analytical troubleshooting skills by creating multiple projects and collaborating with colleagues with different learning and working styles.
- Recieved constructive criticism and leveraged that feedback to better my projects and grow as a human-centric software engineer.

Comcast, San Jose, CA — Communication Technician. July, 2007 - Present

- Leveraged technical knowledge to repeatedly win awards for successfully installing and repairing services on the first visit to customer's homes, including the Comcast BowTie award for the best technician of the quarter.
- Patiently taught customers how to use multiple new services and explained complex technical information using strong communication skills to focus on the individual customer's specific needs and learning style.
